

Report via APIs

Summary

For PPMP, SJIT and Omni sellers leveraging third party integrations with Myntra can now access reports on inventory, sales and returns for visibility and accounting. The reports that were exclusively available on Partner Portal can now be viewed by them through chosen tech partners.

Pre Requisites

1. The tech partner must be integrated for the sellers on Myntra before calling these APIs
2. Each seller will have a unique merchant ID and secret key, provided by Myntra on call team/onboarding, necessary for authentication
3. Rate Limiting : 200/min/seller for calling the API
4. Date range: Can support data for a year
5. **As these APIs are still in the roll out phase, the seller consent needs to be shared from the tech partner for Whitelisting. This can be done by writing to sneha.kulukuru@myntra.com and ram.mohan@myntra.com with the seller and tech partner details.**

Feature Design

The tech partner will call Myntra API with the vendor authentication. The schedule API will be called by the partner to get the job ID and upon using the fetch API, the report will be shared in a CSV format.

Salient Points

There are a few sellers that operate in both PPMP and SJIT models but Myntra supports them via separate seller accounts. For the sellers intending to get access to these reports in a single account of 3P partners, the tech partner is expected to maintain the SJIT seller ID authentication details as well

API Format

Report Schedule API:

```
curl --location --request POST
'https://api-integration.myntra.com/partner/v4/portal/report/:reportName' \
--header 'Accept: application/json' \
--header 'Authorization: Basic
ZWJ0YXNhbmZhcmlkeTFAbXludHJhLmNvbXNhZDpNeW50cmFAMjAyMQ==' \
--header 'Content-Type: application/json' \
--header 'access_token: <access-token>' \
--data '{
  "fromDate": "2024-10-09", //optional
  "toDate": "2024-10-06", //optional
  "partnerType": "SJIT" //mandatory
}'
```

Response:

```
{
  "statusCode": 202400,
  "statusMessage": "Report job scheduled successfully",
  "statusType": "SUCCESS",
  "totalCount": 0,
  "jobId": 1234
}
```

Report Fetch API:

```
curl --location -g 'http://api-integration.myntra.com/partner/v4/portal/report/download/:jobId' \
--header 'Content-Type: application/json' \
--header 'access_token: <access-token>' \
--header 'x-partner-store: omni'
```

Response:

```
{
  "statusCode": 202409,
  "statusMessage": "Job Completed.",
  "statusType": "SUCCESS",
  "successFile":
  "https://myntrapp.blob.core.windows.net/reportjob/OMLPMO7x_2023-06-27_Seller_Listings_Re
```

```
port_2_6880.csv?sv=2023-11-03&se=2024-11-07T13%3A34%3A15Z&sr=b&sp=r&sig=rPxtdLyn
8LZ%2FEfohk2mOpuvu1L%2B9k2dobBfFTyow7DU%3D",
  "status": "COMPLETED"
}
```

Reports Available

[Sample Report](#)

Order Report Status:

Order Status	full form	Meaning
C	Completed	Order delivered to customer and Return window is closed
F	Failed	Order Failed to be pushed to Myntra system
RTO	Return to Origin	Order canceled post Packing
SH	Shipped	Order Shipped
DL	Delivered	Order delivered to customer and Return window is open
IC	Customer Cancellation	Order canceled before Packing
WP	Warehouse Processing	Order Processing initiated but yet not packed
PK	Packed	Order Packed but yet to shipped

Return Report Status:

Status	Meaning
Ret Created	Order Return created by customer
Ret Delivered	Order Returned by customer & Delivered to SJIT warehouse
Delivered	Order get RTO and Delivered to SJIT Warehouse
RTO Created	Order RTO Created
RTO Lost	Order Lost in Transit after RTO
